

Startbox

The winder for all watches !

Startbox

For watch lovers...

As you can imagine, there is better storage for your mechanical watch than the edge of a sink! Because your watch may have been designed to accompany you in your daily life, but it is up to you, the proud owner, to take care of it at its true value.

Imagine how vulnerable your watch is when you're not wearing it. On a dresser, a child pushes it around; in a cupboard, a pile of laundry staggers and drops it; or in the bathroom, toothpaste splashes on the leather strap. Not to mention the variations in humidity and temperature as well as the dust that this type of storage generates, all of which are not recommended for a mechanical movement. Opt instead for maximum caution.

A watch winder, is an excellent option for storage. Not only does your mechanical automatic watch remain protected from dust and scratches, but the rotating support keeps it perfectly wound and on time. The movement of the watch thus continues to run, without the risk of the oils and greases used for its lubrication starting to stick. Icing on the cake (or cabochon on the crown!), a rotating case such as a Startbox allows you to admire your (almost) sleeping beauty.

Startbox

Technical characteristics:

Made in Switzerland

Dimensions : 12 x 12 x 12 cm

Stops in a vertical position

Works on battery
(3 years autonomy)

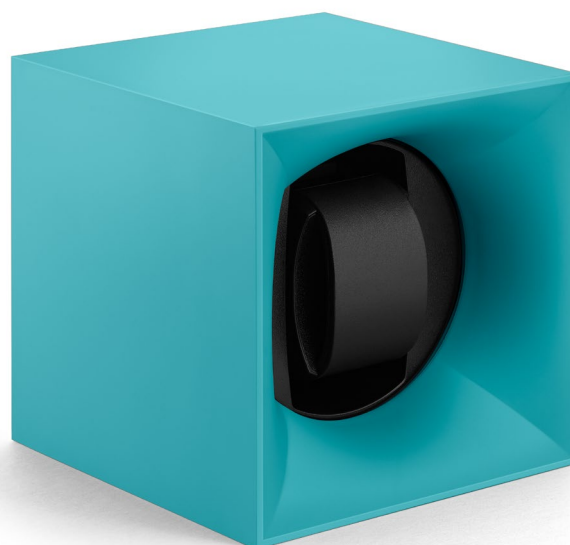

3-years international warranty

Exclusive, modern and contemporary
design

AQUA

Materials and options:

Outside: Softouch plastic

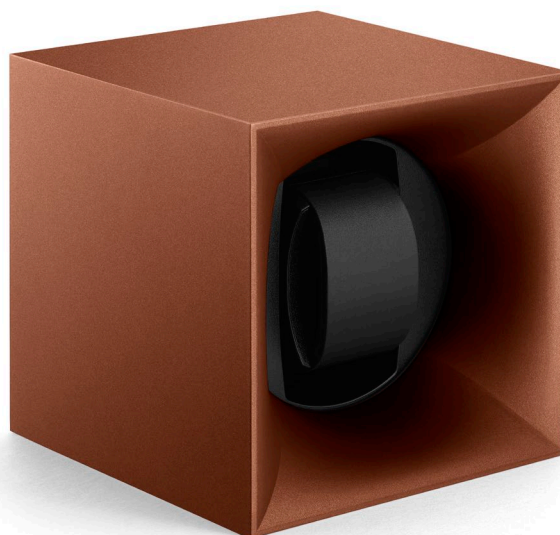

Watch holder: Small or standard

Reference: SK01.STB.012

Public price: £450

BRONZE

Materials and options:

Outside: Softouch plastic

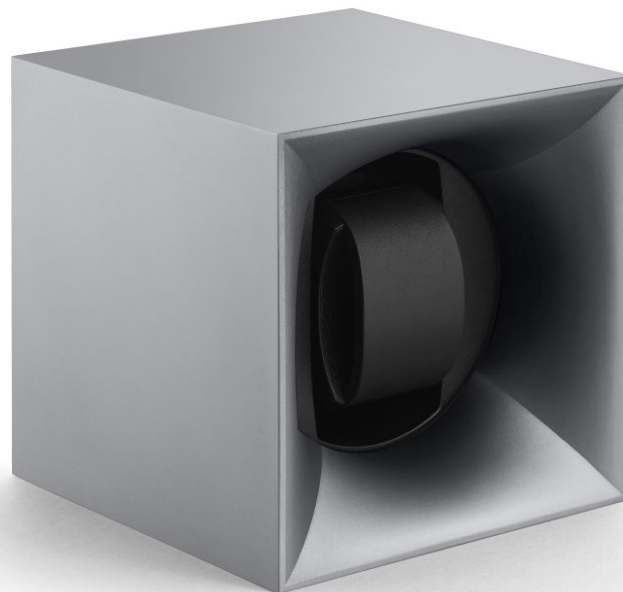

Watch holder: Small or standard

Reference: SK01.STB.011

Public price: £450

METTALIZED GREY

Materials and options:

Outside: Softouch plastic

Watch holder: Small or standard

Reference: SK01.STB.000

Public price: £450

BLACK

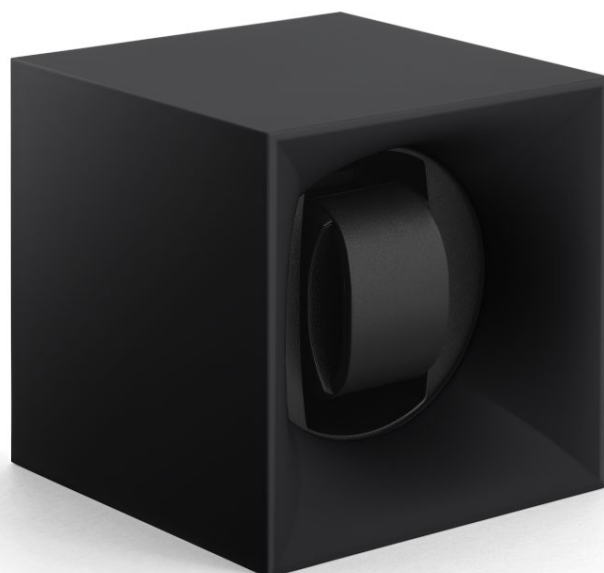

Materials and options:

Outside: Softouch plastic

Watch holder: Small or standard

Reference: SK01.STB.001

Public price: £450

GREEN

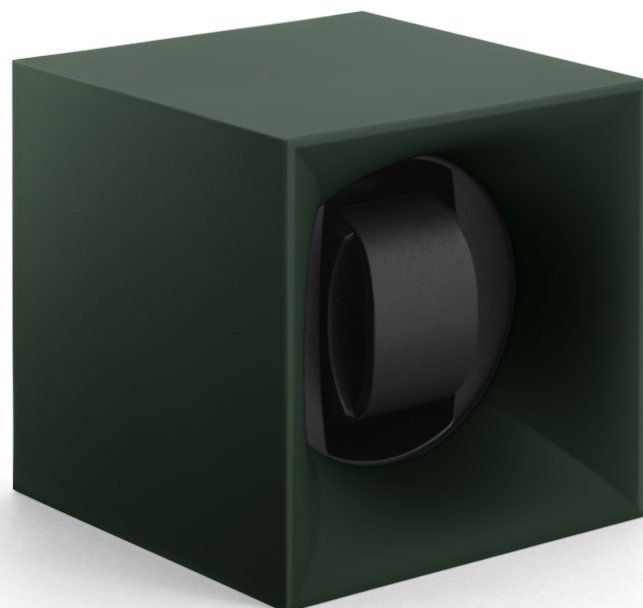

Materials and options:

Outside: Softouch plastic

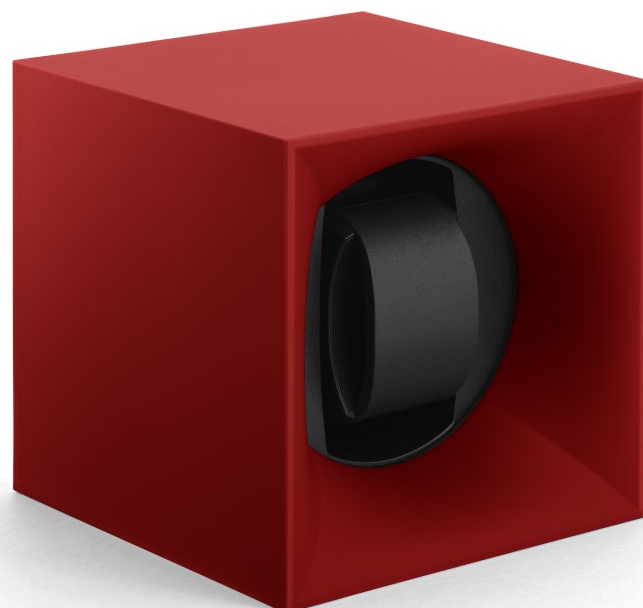

Watch holder: Small or standard

Reference: SK01.STB.002

Public price: £450

RED

Materials and options:

Outside: Softouch plastic

Watch holder: Small or standard

Reference: SK01.STB.004

Public price: £450

RED SWISS CROSS

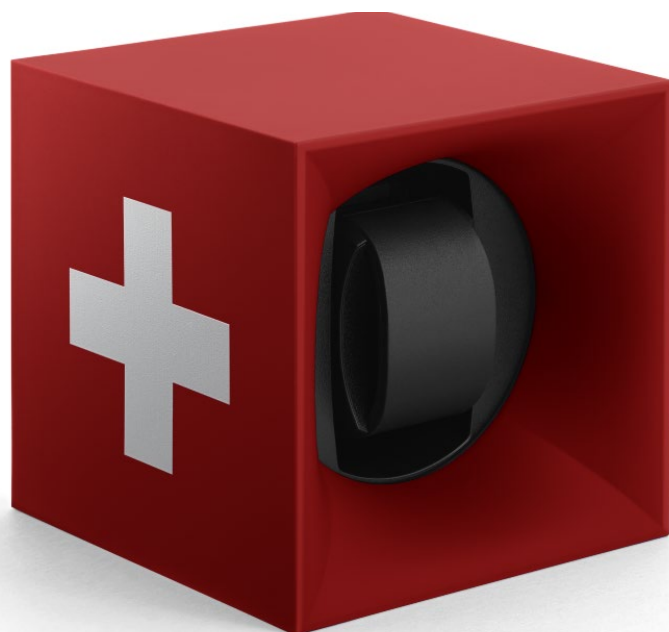

Materials and options:

Outside: Softouch plastic

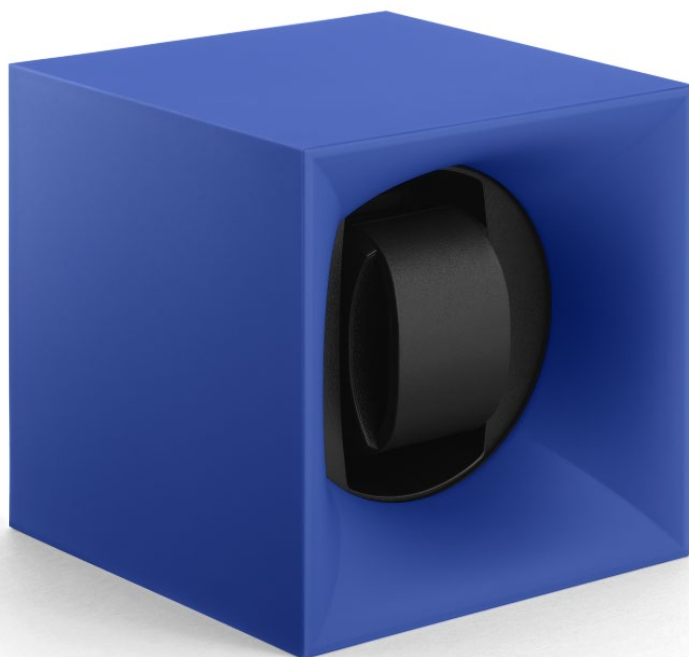

Watch holder: Small or standard

Reference: SK01.STB.004.SWISS

Public price: £450

BLUE

Materials and options:

Outside: Softouch plastic

Watch holder: Small or standard

Reference: SK01.STB.005

Public price: £450

ORANGE

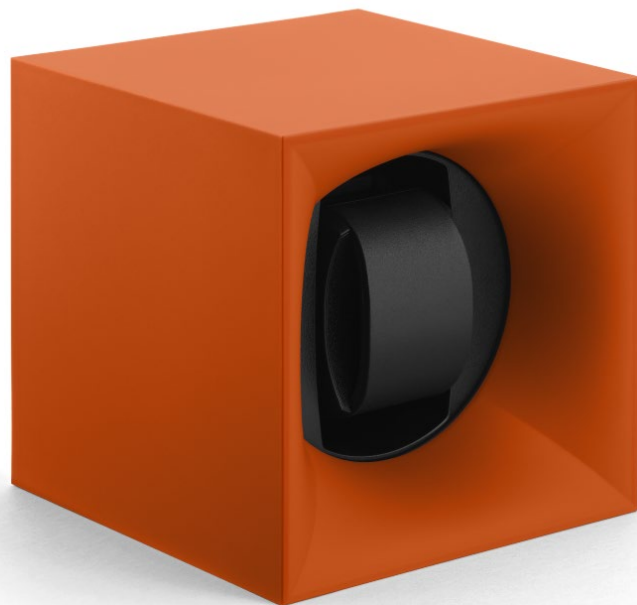

Materials and options:

Outside: Softouch plastic

Watch holder: Small or standard

Reference: SK01.STB.010

Public price: £450

PROTECT. MAINTAIN. ENHANCE.

In order to preserve the value you attach to your timepiece, it is advisable to conjugate three verbs in the present tense.

Protect

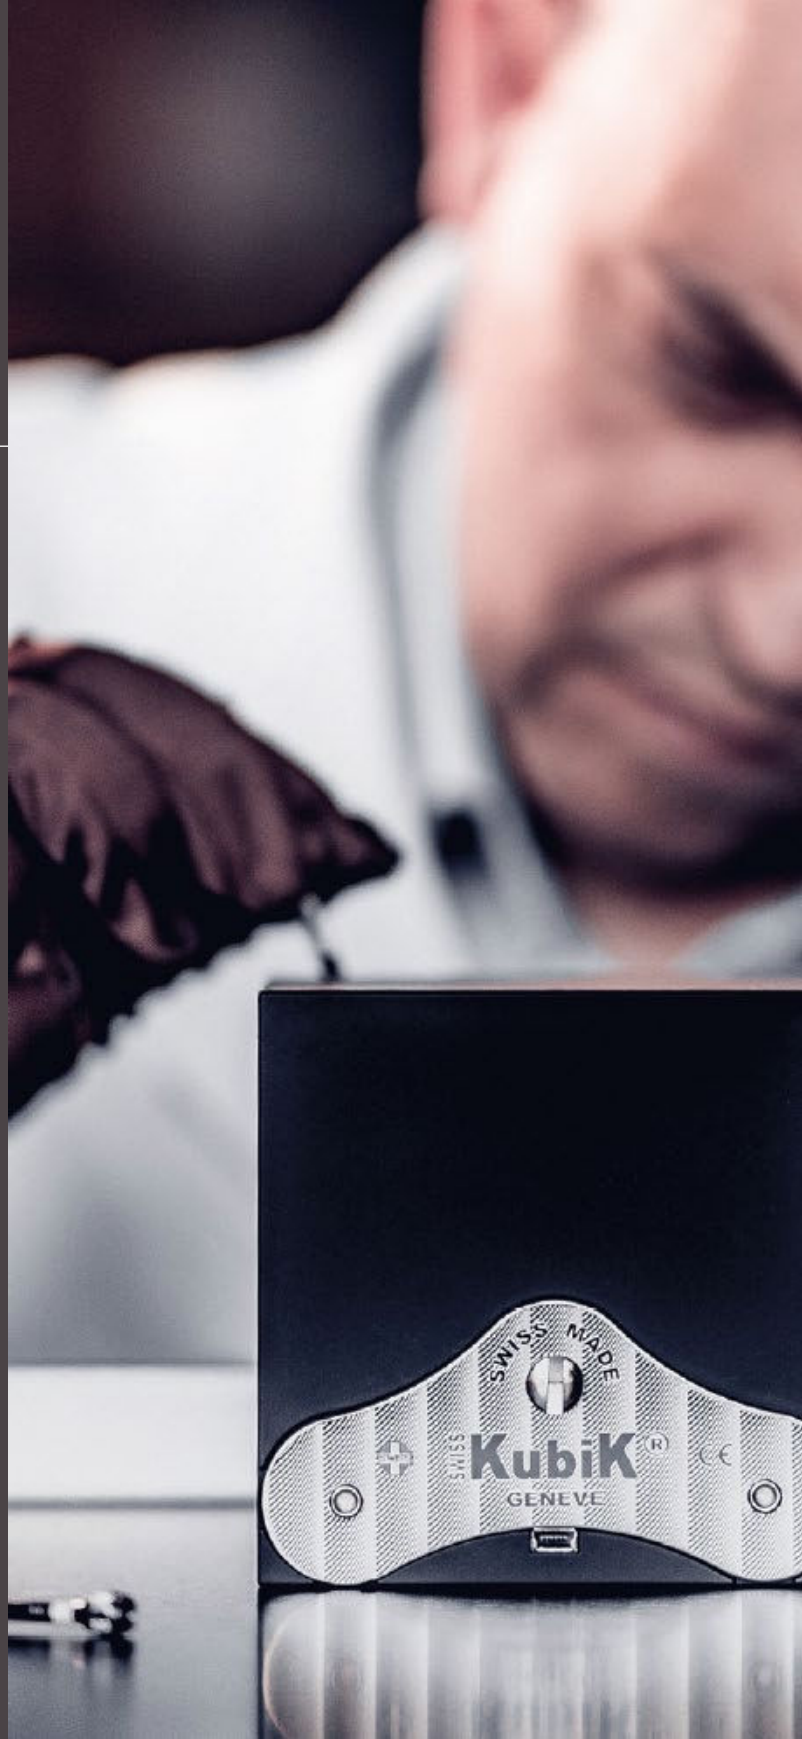

When a timepiece is not worn, the easiest way to protect it from shocks, scratches, water, dust, etc. is its case or its watch winder. Regular cleaning is also a good protection against daily aggression or the passage of time.

Maintain

If the watch is not worn regularly, it is advisable to place the timepiece in a watch winder. In addition, a regular inspection of the seal by an authorised watchmaker guarantees it functions properly and maintains its value.

Enhance

Sophisticated system of great precision, an automatic watch is also a beautiful piece of work that we like to wear and admire. Apart from your wrist, what better place to highlight it than a watch winder?
